Mark Scheme (Results)

Summer 2024

Pearson Edexcel GCSE
In Biology (1BI0)
Paper 1H

GRADEUP.UK

Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

Question number	Answer	Mark
1(a)(i)	<p>C natural selection</p> <p>The only correct answer is C</p> <p><i>A is not correct because genetic engineering is not involved in the theory of evolution</i></p> <p><i>B is not correct because biological control is not involved in the theory of evolution</i></p> <p><i>D is not correct because tissue culture is not involved in the theory of evolution</i></p>	<p>(1)</p> <p>AO1 1</p>

Question number	Answer	Additional guidance	Mark
1 (a)(ii)	<p>Two from:</p> <ul style="list-style-type: none"> • genetics / mutation / alleles (1) • sexual reproduction / meiosis (1) • environment / named environmental factors e.g. diet, lifestyle, climate, temperature (1) 	<p>accept genes / genetic modification ignore DNA</p> <p>accept idea of different parents / breeding ignore inbreeding / selective breeding</p> <p>accept changes to the environment</p> <p>ignore adaptations to environment / selection pressures / / natural selection / disease</p>	<p>(2)</p> <p>AO1 1</p>

Question number	Answer	Additional guidance	Mark
1(a)(iii)	<p>Any one from:</p> <ul style="list-style-type: none"> • change in the environment • competition • (increase in) predators • change in {prey / food source / resources / habitat} • natural disaster 	<p>accept {climate / weather} change</p> <p>accept use of antibiotics / named chemicals e.g. pesticides</p> <p>accept idea of availability of / decrease in</p> <p>ignore bacteria / pathogens / named pathogens</p>	<p>(1)</p> <p>AO1 1</p>

Question number	Answer	Additional guidance	Mark
1(b)(i)	<p>An answering including two from:</p> <ul style="list-style-type: none"> • (different) mutations occurred (1) • selection pressure (1) • different {environments / climate / habitats / ecosystems} (1) 	<p>accept different weather / temperature / conditions</p>	<p>(2)</p> <p>AO2 1</p>

	<ul style="list-style-type: none"> • different {food / prey / predators} (1) • different disease (1) • unable to inter-breed (1) 	<p>accept pathogens / named pathogens</p> <p>accept unable to reproduce / mate / breed</p> <p>accept geographically isolated</p> <p>accept idea of different ancestors (1)</p>	
--	---	---	--

Question number	Answer	Additional guidance	Mark
1(b)(ii)	<p>One from:</p> <ul style="list-style-type: none"> • his results {were similar / backed-up the work of Darwin / provided more evidence} • Darwin wanted to get the credit • he showed that animal populations {adapt/evolve} (to their environment) • he showed that animals have evolved from common ancestors 	<p>accept idea of it being a form of peer review accept they agreed with each other</p> <p>accept {selection pressure / environment} causes differences in characteristics</p>	<p>(1)</p> <p>AO1 1</p>

(Total for question 1 = 7 marks)

Question number	Answer	Mark
2(a)(i)	<p>B amino acids</p> <p>The only correct answer is B</p> <p><i>A is incorrect because sugars are not produced when a protein is broken down.</i></p> <p><i>C is incorrect because fatty acids are not produced when a protein is broken down.</i></p> <p><i>D is incorrect because starches are not produced when a protein is broken down.</i></p>	<p>(1) A01 1</p>

Question number	Answer	Additional guidance	Mark
2(a)(ii)	<p>A description including three from:</p> <ul style="list-style-type: none"> • (activity) increases (1) • from pH 0.2 / to pH 2 (1) • optimum (activity) at pH 2 (1) <ul style="list-style-type: none"> • (pepsin activity) decreases {from pH 2 / to pH 3.5} (1) 	<p>accept best / maximum / most active / optimal / peak for optimum</p> <p>accept pH 3.6</p>	<p>(3) A03 1a 1b</p>

Question number	Answer	Mark
2(a)(iii)	(pH) 8 / 8.0 / eight accept phonetic spellings of eight	(1) A03 1a

Question number	Answer	Additional guidance	Mark
2(a)(iv)	<p>An explanation including three from:</p> <ul style="list-style-type: none"> pH 5 is too {acidic / low} (1) active site (of the enzyme) has changed (1) (so the) substrate will not {fit into / bind with} (the active site) (1) no enzyme-substrate complex is formed (1) because the enzyme is denatured (1) 	<p>accept proteins for substrate</p> <p>accept enzyme and substrate are no longer complementary</p> <p>ignore references to collisions between the substrate and the active site</p> <p>the active site is denatured is two marks</p>	(3) A02 1

Question number	Answer	Additional guidance	Mark
2(a)(v)	(use a) water bath / incubator / idea of how the temperature can be set in a room	accept a description of a water bath ignore in the same room / use a thermometer	(1) AO1 2

(Total for question 2 = 9 marks)

GRADEUP.COM

Question number	Answer	Mark
3(a)(i)	<p>C a protist</p> <p>The only correct answer is C</p> <p><i>A is incorrect because malaria is not caused by a bacterium</i></p> <p><i>B is incorrect because malaria is not caused by a fungus</i></p> <p><i>D is incorrect because malaria is not caused by a virus</i></p>	<p>(1) AO1 1</p>

Question number	Answer	Additional guidance	Mark
3(a)(ii)	by vectors / mosquitoes	<p>accept blood transfusions / through blood / sharing contaminated needles</p> <p>ignore insects / animals</p>	<p>(1) AO1 1</p>

Question number	Answer	Additional guidance	Mark
3(b)	<p>An explanation linking:</p> <ul style="list-style-type: none"> • (the number of measles cases reported) has decreased (1) 	<p>accept herd immunity</p> <p>accept by vaccines /</p>	<p>(2) AO2 1</p>

	<ul style="list-style-type: none"> • because {people have been immunised / more people are immune} (1) 	vaccination	
--	---	-------------	--

Question number	Answer	Additional guidance	Mark
3(c)	Any two from: <ul style="list-style-type: none"> • white blood cells {kill / destroy} pathogens (1) • (WBC) produce {antibodies / antitoxins} (1) • memory lymphocytes (are produced) (1) 	accept named pathogens accept phagocytosis accept WBC engulf pathogens reject antigens accept memory cells accept rise in body temperature / inflammation / more mucus produced / more WBC are produced / WBC move to site of infection (1)	(2) AO1 1

Question number	Answer	Additional guidance	Mark
3(d) Overlap	(beriberi) is not spread from person to person / is not caused by a {pathogen	accept organisms for people	(1) AO2 1

	/ named pathogen}	ignore it is a deficiency disease / not infectious / not contagious / it is caused by a lifestyle factor	
--	-------------------	--	--

(Total for question 3 = 7 marks)

GRADEUP.UK

Question number	Answer	Mark
4(a)(i)	<p>B the characteristic is dominant</p> <p>The only correct answer is B</p> <p><i>A is not correct because the characteristic is not recessive</i></p> <p><i>C is not correct because the characteristic is not a mutation</i></p> <p><i>D is not correct because the characteristic is not environmental</i></p>	<p>(1)</p> <p>A03 1a</p>

Question number	Answer	Additional guidance	Mark
4(a)(ii)	<p>One from:</p> <ul style="list-style-type: none"> • 40 (1) • 480 (1) • $160 \div 4$ ($\times 3$) (1) • 160×3 ($\div 4$) (1) • 160×0.75 (1) • $160 \times \frac{3}{4}$ (1) <p>AND</p> <p>Evaluation</p> <p>120</p>	<p>award full marks for the correct answer with no workings</p> <p>accept 120:40 for two marks accept 40:120 for one mark</p>	<p>(2)</p> <p>A02 2</p>

Question number	Answer	Additional guidance	Mark									
4(a)(iii)	<p style="text-align: center;">white flowers</p> <table border="1" style="margin-left: auto; margin-right: auto;"> <tr> <td></td> <td style="text-align: center;">a</td> <td style="text-align: center;">a</td> </tr> <tr> <td style="text-align: center;">A</td> <td style="text-align: center;">Aa</td> <td style="text-align: center;">Aa</td> </tr> <tr> <td style="text-align: center;">a</td> <td style="text-align: center;">aa</td> <td style="text-align: center;">aa</td> </tr> </table> <p style="margin-left: 20px;">purple flowers</p> <p>correct genotype for white flowers (1)</p> <p>correct offspring from their parental gametes (1)</p> <p>percentage of white flowers = 50% (1)</p>		a	a	A	Aa	Aa	a	aa	aa	<p>accept aA for Aa</p> <p>ignore other letters for genotypes</p> <p>ecf for incorrect gametes for white flowers</p> <p>ecf from incorrect Punnett square</p>	<p>(3)</p> <p>AO3</p> <p>1a+1b</p>
	a	a										
A	Aa	Aa										
a	aa	aa										

Question number	Answer	Additional guidance	Mark
4(b)	<p>Any two from:</p> <ul style="list-style-type: none"> genetically identical offspring (1) they will have the {same / desired} characteristics (1) 	<p>accept clones produced / same (advantageous) alleles</p> <p>ignore no variation / same genes</p> <p>accept same features</p> <p>accept named characteristics e.g. flower colour</p>	<p>(2)</p> <p>AO2</p> <p>1</p>

	<ul style="list-style-type: none"> • (flowering plants) produced faster (1) • only one parent plant needed (1) 	<p>accept shorter reproductive cycle / reproduce faster</p> <p>accept no need to find a mate / no need for {pollination / (named) pollinators}</p> <p>ignore more plants are produced / needs less resources / energy efficient / cheaper</p>	
--	---	---	--

Question number	Answer	Mark
4(c)(i)	<p>A a section of a DNA molecule that codes for a protein</p> <p>The only correct answer is A</p> <p><i>B is not correct because a chromosome does not code for DNA so it is not a gene</i></p> <p><i>C is not correct because the the entire DNA of an organism is not a gene</i></p> <p><i>D is not correct because a section of a chromosome which coils into a double helix is not a gene</i></p>	<p>(1)</p> <p>AO1 1</p>

Question number	Answer	additional guidance	Mark
4(c)(ii)	<p>An answer including two from:</p> <ul style="list-style-type: none"> • A with T / C with G (1) • weak (1) 	<p>accept names of bases</p>	<p>(2)</p> <p>AO1 1</p>

	<ul style="list-style-type: none">• hydrogen bonds (1)	accept H bonds

Question number	Indicative content	Mark
* 10(c)	<p style="text-align: center;">A01 (6 marks)</p> <p>Infection</p> <ul style="list-style-type: none"> • virus binds to the host cell • viral genetic material injected into the host cell <p>Lytic</p> <ul style="list-style-type: none"> • virus is replicated • uses the host cell resources / named resources • to produce more viral genetic material • produce viral proteins • new viruses assemble • the host cell is lysed <p>Use</p> <ul style="list-style-type: none"> • to kill bacteria (instead of antibiotics) • reducing the problem caused by antibiotic resistance / people not finishing the course • bacteriophage do not affect animal cells • replicate themselves (so will continue to have an effect) 	<p>(6)</p> <p>A01 A02</p>

Level	Mark	Descriptor
	0	No rewardable material.
Level 1	1-2	<ul style="list-style-type: none"> • Demonstrates elements of biological understanding, some of which is inaccurate. Understanding of scientific ideas lacks detail.

		<ul style="list-style-type: none"> • Presents a description with some structure and coherence.
Level 2	3–4	<ul style="list-style-type: none"> • Demonstrates biological understanding, which is mostly relevant but may include some inaccuracies. Understanding of scientific ideas is not fully detailed and/or developed. • Presents a description that has a structure which is mostly clear, coherent and logical.
Level 3	5–6	<ul style="list-style-type: none"> • Demonstrates accurate and relevant biological understanding throughout. Understanding of the scientific ideas is detailed and fully developed. • Presents a description that has a well-developed structure which is clear, coherent and logical.

Level	Mark	Additional guidance
Level 1	1–2	<ul style="list-style-type: none"> • A brief description of the lytic cycle or the process of infection. • Links this to an indication of how bacteriophage could be used as an alternative to antibiotics
Level 2	3–4	<ul style="list-style-type: none"> • A good description of the lytic cycle of a virus including the production of virus components or the use of host cell machinery • Gives a reason why bacteriophage could be used as an alternative to antibiotics and does not refer to lysogenic steps
Level 3	5–6	<ul style="list-style-type: none"> • A detailed description of the lifecycle of a virus including the production of viral proteins using the host cell machinery. • Gives reasons why bacteriophage could be used as an alternative to antibiotics and does not refer to lysogenic steps
